

Patient/Carer Representative King's Health Partners Haematology Programme Board

We are looking for two enthusiastic and committed patient or carer representatives to be part of the Kings Health Partners Haematology Programme Board.

Our Haematology Clinical Academic partnership is developing a world-leading patient-centred Haematology programme that takes the latest research from bench-to-bedside, supporting and training healthcare professionals to provide the best possible care for people with blood diseases.

The programme includes haematology services at Guy's & St Thomas' and King's College Hospital NHS Foundation Trusts and haematology research at King's College London University.

King's Health Partners Haematology Programme Board was first established in 2017 and acts as a forum to provide strategic direction to the Kings Health Partners Haematology programme and workstreams.

The programme board meeting takes place every 2 months for 1.5 hours using Microsoft Teams. Patient/Carer representatives will be expected to attend the meetings championing a service user, patient and/or carer viewpoint. The role also requires approx. 1 hour of time ahead of each meeting for reading papers and preparation. Gift vouchers are offered as a token of appreciation for your time.

If you are a Patient or Carer for someone who has experienced haematological health issues*, and would be interested in being part of the programme board and/or would like more information, please get in touch with: Becky Barnes – becky.barnes@kcl.ac.uk / 07773 147379 by 31st January 2023. Please note any queries sent over the Christmas period will be responded to on 3rd January.
